

Environmental Solution, Inc. adds a dozen bioremedial cleaning products to USDA BioPreferredSM Online Catalog

The Online Catalog provides Federal and contractor personnel with a searchable database of biobased approved products.

Wake Forest, NC (10/28/2010) — *Environmental Solution, Inc.* is pleased to announce the acceptance and inclusion of twelve of their bioremedial cleaning products into the U.S. Department of Agriculture's (USDA) BioPreferred program. This is a Federal purchasing program for biobased products and includes an online, searchable catalog that is a user-friendly database to find bio-based products that meet BioPreferred program stringent requirements and guidelines.

Environmental Solution, Inc. distributes alternative cleaning products for industrial, maritime, and food processing applications. Our product line provides superior cost effective, neutral pH, aqueous, safe-to-use, non-corrosive, and non-toxic results in addition to providing superior cleaning performance and assist with the bioremediation of the waste stream. We also distribute a line of products for the remediation of soil, oil water separators, grease traps and other pollution remediation applications. We distribute biobased solvent replacements that are USDA BioPreferred and meet USDA 7CFR Part 2402 requirements.

"Over the years, we have developed many environmentally beneficial and effective products that eliminate hydrocarbon contamination in a wide variety of applications. Our products return the environment to its original state prior to the contamination. We are thrilled to have many of our products included and accepted by the BioPreferred program," notes John Paparone, Environmental Solution, Inc. president.

BioPreferred is a Federal program that seeks to increase the purchase and use of biobased goods and products made from biological or renewable materials.

"Initially, the catalog was created to help Federal procurement officers identify biobased products that qualify for preferred purchasing," said Ron Buckhalt, BioPreferred's program manager. "But the BioPreferred online catalog is accessible to anyone who wants to search for biobased products. We are gratified so many find the catalog a useful tool."

Click or visit: <http://www.biopreferred.gov/Catalog.aspx> for the BioPreferred's online product catalog which is searchable by product category (i.e. construction and road maintenance, housewares and cleaning products, etc) and further by subcategory, manufacturer name or product name. Today, more than 1480 biobased products manufactured by more than 320 companies are in the online catalog, with new products continually being added.

Environmental Solution, Inc. is listed in the catalog under the subcategories of: Industrial Cleaners, Parts Wash Solutions, Sorbents, Graffiti and Grease Removers, and Adhesive and Mastic Removers. The specific product names are:

- Bio-W
- FleetKleen
- FPT-100
- FPT -600
- Liquid Remediate
- NavalKleen
- OFM-500
- OWS-200
- Parts Washer
- Parts Washer - Bio Based
- Remediate (liquid or powder)
- SpillAway+ Absorbent

BioPreferred estimates more than 19,000 biobased products are commercially available, and manufactured by more than 2,540 businesses, both large and small— including many in rural communities. The 2002 Farm Bill, then reauthorized by the 2008 Farm Bill, requires all Federal agencies to give procurement preference to BioPreferred designated items, helping biobased manufacturers gain a portion of the estimated \$500 billion Federal agencies annually spend on products and services. Additional product development support for biobased manufacturers and Federal environmental purchasing mandates came in October 2009 with Executive Order 13514: Federal Leadership in Environmental, Energy, and Economic Performance. This Administration directive requires Federal agencies to purchase various “green” items (including BioPreferred products) in 95 percent of all applicable contracts.

About Environmental Solution, Inc.

Headquartered in Wake Forest, NC, *Environmental Solution, Inc.* is the unquestioned leader in the exciting technology of bioremediation. We provide the largest range of products for almost every type of petroleum, hydrocarbon contamination cleanup for:

- Industrial/Transportation/Commercial/RV's
- Food Processing Plants & Restaurants
- Ocean Vessels/Pleasure Craft/Marinas
- Soil and Water
- Biobased Solvent Replacements

About biobased products:

As defined by Farm Security and Rural Investment Act of 2002 (FSRIA), “biobased products” are products determined by the U.S. Secretary of Agriculture to be commercial or industrial goods (other than food or feed) composed in whole or in significant part of biological products, forestry materials or renewable domestic agricultural materials, including plant, animal or marine materials.

About BioPreferred:

BioPreferred was created by the Farm Security and Rural Investment Act of 2002 (2002 Farm Bill), and expanded by the Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) to increase the purchase and use of biobased products. The U.S. Department of Agriculture manages the program. BioPreferred includes a preferred procurement program for Federal agencies and contractors, and a voluntary labeling program for the broad scale consumer marketing of biobased products.

A complete list and detailed description of each BioPreferred designated item, and items for future designation, can be found at : www.biopreferred.gov or follow BioPreferred at: twitter.com/BioPreferred
